Allied Paper, Inc./Portage Creek/Kalamazoo River Superfund Site
King Highway Landfill Operable Unit
Landfill Gas Monitoring Program
Quarterly Report (2012 Quarter 3)

Date:
September 19, 2012

Dear Mr. Krawczyk:

On behalf of Georgia-Pacific LLP (Georgia-Pacific), this letter presents results from the 2012 third quarter post-closure landfill gas monitoring event conducted on August 23 and September 6, 2012¹ at the Allied Paper, Inc./Portage Creek/Kalamazoo River Superfund Site King Highway Landfill Operable Unit 3 (KHL OU) located in Kalamazoo, Michigan. The August/September 2012 monitoring event reflects continued quarterly monitoring activities performed consistent with the June 2002 *Final KHL-OU Landfill Gas Monitoring Plan* (LGMP) prepared by Blasland, Bouck & Lee, Inc. on behalf of Georgia-Pacific. Consistent with previous landfill gas monitoring events, representatives from the Michigan Department of Environmental Quality (MDEQ) were present to observe the monitoring activities, which were performed by ARCADIS using a GEM™ 500 portable gas analyzer.

Monitoring results for the August/September 2012 event are presented in Table 1 and Figure 1; all monitoring results recorded to date are presented in Table 2 and Figure 2 (methane only).

Monitoring of the four permanent gas vents located within the landfill proper (V-1-1, V-2-1, V-2-2, and V-3-1) resulted in methane detections at concentrations above the lower explosive limit (LEL) of 5% at three of the four vents (i.e., V-1-1, V-2-1, and V-2-2).

¹ Landfill gas monitoring was conducted at all permanent gas vents and probes on August 23, 2012, with the exception of gas probes GW-16 and GW-17 and gas vent V-3-1. As such, gas probes GW-16 and GW-17 and gas vent V-3-1 was conducted on September 6, 2012.

Monitoring of the eight permanent landfill gas monitoring probes located within the property boundary (GW-1 through GW-4 and GW-11 through GW-14) resulted in methane detections at concentrations above the LEL in six of the eight gas probes (i.e., GW-1 through GW-4, GW-13, and GW-14). Note that gas probes GW-13 and GW-14 are located along the western side of the OU. Monitoring of the 14 permanent gas vents located within the property boundary (V-1-2 through V-1-6, V-2-3, V-2-10, V-2-18, and V-4-1 through V-4-6) (i.e., the vents associated with the perimeter cutoff trenches) resulted in methane detections at concentrations above the LEL at one of the 14 vents (i.e., V-1-4).

Monitoring of the nine permanent landfill gas monitoring probes located outside the landfill property boundary (GW-5 through GW-10 and GW-15 through GW-17) resulted in no methane detections at concentrations above LEL in any of the nine gas probes.

Pursuant to the contingency actions outlined in Section 4.3 of the LGMP, 10 additional temporary boreholes (BH-2-01, BH-13-01 through BH-13-08, and BH-14-01) were installed outside the landfill proper and monitored to delineate the extent of methane concentrations above the LEL to the east of gas probe GW-2, west and north of gas probe GW-13, and west of gas probe GW-14, respectively (see Figure 1 for monitoring locations). Monitoring results indicated that methane concentrations were above the LEL in temporary boreholes BH-13-01, BH-13-03, and BH-13-05. However, monitoring results indicated that methane concentrations were below the LEL at temporary boreholes BH-13-02, BH-13-04, and BH-13-06, which were installed to the west of temporary boreholes BH-13-01, BH-13-03, and BH-13-05, respectively, along the west side of the OU (inside the property boundary). However, per MDEQ's request, Georgia-Pacific is currently evaluating the feasibility of extending the existing landfill gas cutoff trench (located on the west side of the KHL) to the north, based on the elevated methane concentrations consistently detected in gas probe GW-13 and a few of the surrounding temporary borehole locations. The monitoring results for the remaining temporary boreholes (BH-2-01, BH-13-07, BH-13-08, and BH-14-01) indicated that methane concentrations were below the LEL.

Additional temporary boreholes were not installed and monitored to delineate the extent of methane concentrations above the LEL to the south of gas probe GW-1 or gas vent V-1-4, as monitoring results associated with permanent gas probes GW-5, GW-6, GW-7, and GW-10 (located south of gas probe GW-1 and gas vent V-1-4) indicated methane concentrations were below the LEL. Additional temporary boreholes were not installed and monitored to delineate the extent of methane concentrations above the LEL to the north of gas probe GW-3, as MDEQ indicated that delineation around gas probe GW-3 could be performed annually.

Mr. Keith Krawczyk
September 19, 2012

The next round of data collection (i.e., the 2012 fourth quarter post-closure landfill gas monitoring event) is anticipated to be conducted in November 2012:

If you have any questions or comments, please do not hesitate to contact me at 315.671.9233.

Sincerely,

ARCADIS

Landfill Gas Monitoring Program

Table 2 - Summary of Post-Closure Landfill Gas Monitoring Results

Notes:

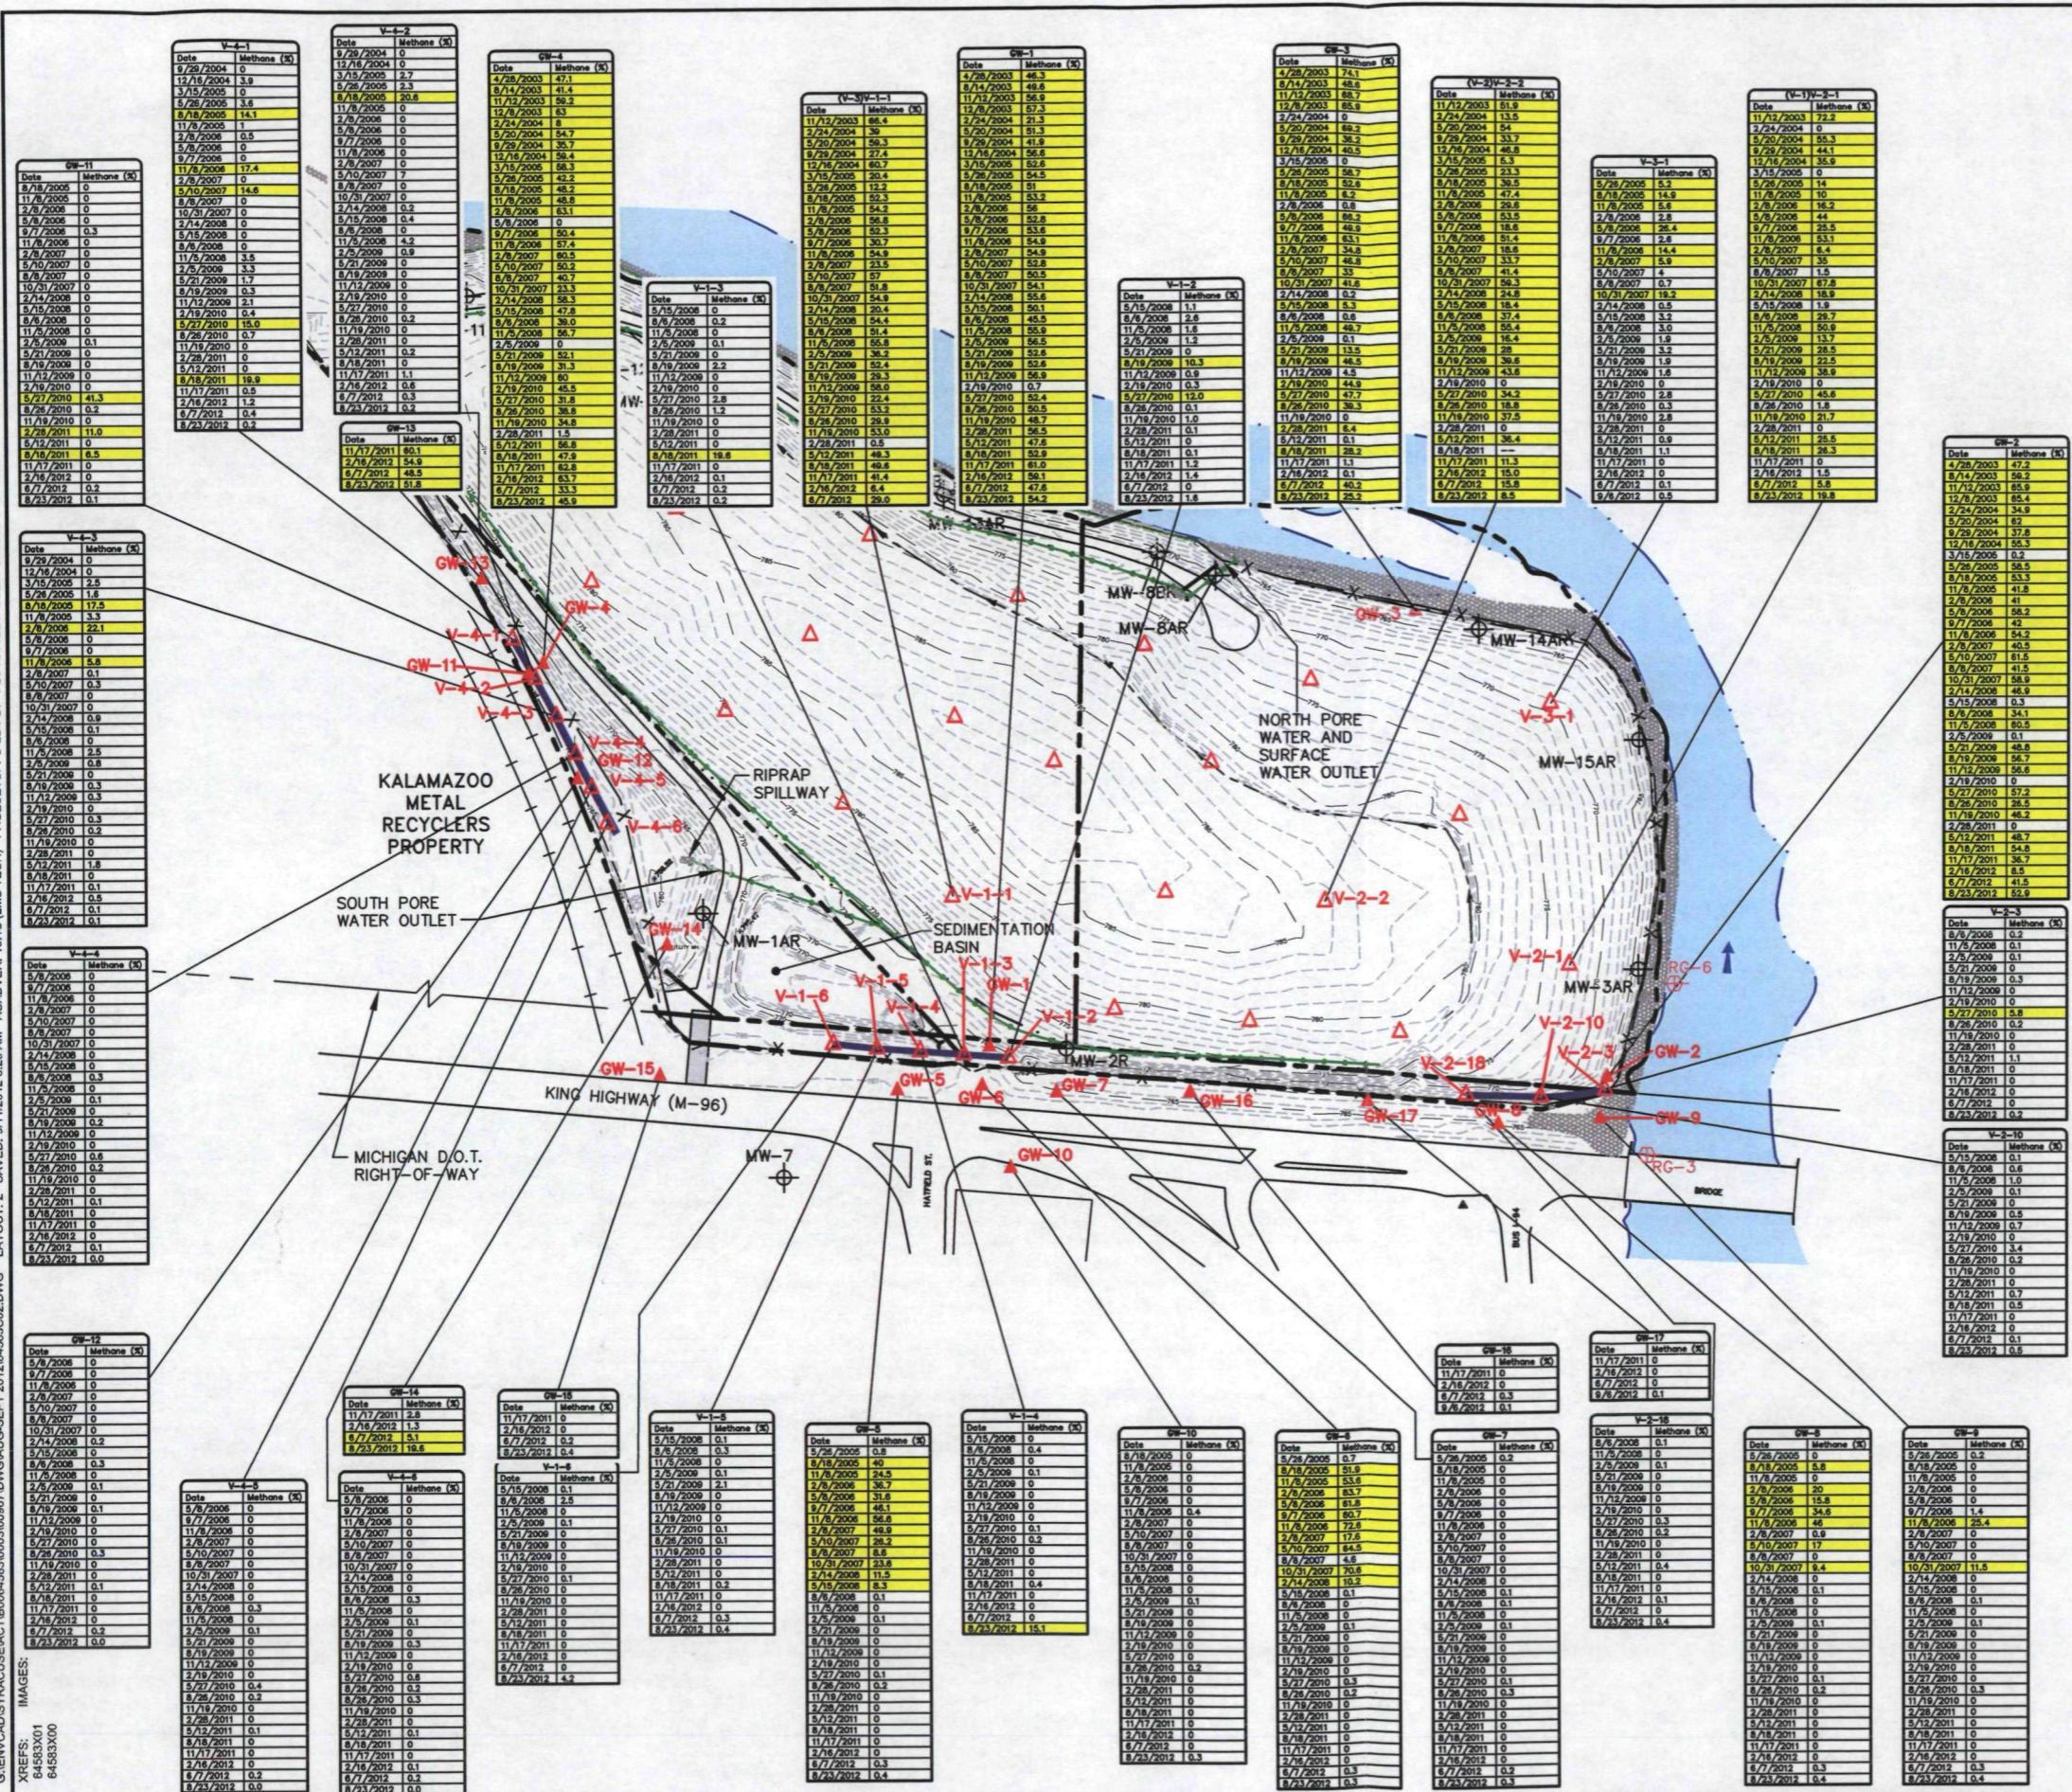

1. Landfill gas monitoring results provided by CTI and Associates, Inc. using a GEM™ 2000 portable gas analyzer from April 27, 2003 to May 21, 2004.
2. Landfill gas monitoring results provided by Golder Associates, Inc. using a GEM™ 500 portable gas analyzer from September 29, 2004 to May 8, 2006, November 8, 2006, May 10, 2007, and August 6, 2008.
3. Landfill gas monitoring results provided by Golder Associates, Inc. using a GEM™ 2000 portable gas analyzer on September 7, 2006, February 8, 2007, August 8, 2007, October 31, 2007, May 15, 2008, November 5, 2008, February 5, 2009, May 21, 2009, August 19, 2009, and November 12, 2009
4. Landfill gas monitoring results provided by ARCADIS using a GEM™ 500 portable gas analyzer on February 19, 2010, May 27, 2010, August 26, 2010, November 19, 2010, February 28, 2011, May 12, 2011, August 18, 2011, November 17, 2011, February 16, 2012, June 7, 2012, August 23, 2012, and September 6, 2012.
5. Landfill gas monitoring results provided by ARCADIS using a GEM™ 2000 portable gas analyzer on February 16, 2012.
6. On February 8, 2006, three other borings were attempted at the location of BH-201, but the boreholes were too wet to provide an accurate reading.
7. The water level at the location of the borehole was too high to provide an accurate reading.
8. On February 8, 2007, methane concentrations were detected above the lower explosive limit at GW-3; however, temporary boreholes were not installed to delineate the extent of the methane due to a health and safety risk created by snow covered rocks along the river.
9. On February 8, 2007, the valve on GW-6 was frozen and the cap could not be removed. The concentrations presented for GW-6 were obtained from a temporary borehole, which was installed directly next to well.
10. An additional temporary borehole(s) was not installed west of permanent gas probe GW-11 to delineate the extent of methane concentrations above the LEL toward the adjacent Kalamazoo Metal Recyclers, Inc. property due to the amount of debris located underneath the ground surface along the western property line of the KHL OU.
11. Due to rapid fluctuations in the gas concentration readings on the GEM™ 2000 portable gas analyzer, the concentrations for all parameters (i.e., CH₄, O₂, and CO₂) could not be determine from the same reading, producing a balance nitrogen concentration for GW-1 less than zero.
12. CH₄ = Methane.
13. CO₂ = Carbon Dioxide.
14. O₂ = Oxygen.
15. GW = Permanent gas monitoring probe.
16. BH = Temporary borehole.
17. V = Permanent gas vent.
18. -- = gas vent was not monitored.

- NOTES:**
- BASE MAP INFORMATION OBTAINED FROM CADD DRAWING FILE DEVELOPED BY RMT, INC., ANN ARBOR, MICHIGAN (CADD FILE: L1630SU01.DWG AS-BUILT SURVEY; 8/21/00).
 - FINAL AS-BUILT CONTOUR ELEVATIONS ARE SHOWN AND ARE BASED ON A FIELD SURVEY BY ATWELL-HICKS, INC., DATED 9/27/00 WITH REVISIONS DATED 10/23/00, 12/21/01, 12/10/02, AND 7/24/03.
 - FINAL AS-BUILT CONTOUR ELEVATIONS OF SEDIMENTATION BASIN ARE BASED ON A FIELD SURVEY BY PREIN-NEWHOF, DATED 2/3/04.
 - ELEVATIONS ARE BASED ON NGVD OF 1929 (MSL).
 - PROPERTY SURVEY PERFORMED BY WILKINS & WHEATON ENGINEERING CO., INC., ON 7/1/96.
 - TOPOGRAPHIC CONTOUR INTERVAL IS 1 FOOT.
 - LOCATIONS SHOWN HEREON REPRESENT PERMANENT MONITORING POINTS, WHICH HAVE BEEN/WILL BE MONITORED DURING THE ONGOING POST-CLOSURE LANDFILL GAS MONITORING PROGRAM.
 - LOCATIONS OF GW-5, GW-6, GW-7, GW-8, GW-9, AND GW-10 ARE BASED ON A FIELD SURVEY BY TERRA CONTRACTING LLC, DATED 9/23/05.
 - LOCATION OF GW-11 IS BASED ON A FIELD SURVEY BY TERRA CONTRACTING LLC, DATED 1/11/06.
 - LOCATIONS OF RG-6, V-4-4, V-4-5, AND V-4-6 ARE BASED ON A FIELD SURVEY BY TERRA CONTRACTING LLC, DATED 6/7/06.
 - LOCATIONS OF V-1-2 THROUGH V-1-6, V-2-3, V-2-10, AND V-2-18 ARE BASED ON MULTIPLE FIELD SURVEYS CONDUCTED BY TERRA CONTRACTING, LLC, IN APRIL 2008.
 - LOCATION OF GW-12 IS APPROXIMATE.
 - = GAS VENT WAS NOT MONITORED.
 - LOCATIONS OF GW-13 THROUGH GW-17 ARE BASED ON A FIELD SURVEY CONDUCTED BY PREIN & NEWHOF ON 11/1/2011.
 - HIGHLIGHTED METHANE RESULTS EXCEEDED THE ASSOCIATED LOWER EXPLOSIVE LIMIT (5%).
